---	---	--

Name of Resource	Achieving Reduction of Child Labor in Support of Education (ARISE)	
Type	Platform for co-operation	
Country / jurisdiction	Global	
Organization	International Labour Organization, Japan Tobacco International, Winrock International	
Initiative launch date	2011	
Description	Achieving Reduction of Child Labor in Support of Education (ARISE) is a programme to help prevent and eliminate child labour in tobacco-growing communities where Japan Tobacco International does business. The partnership began in 2011, with much of that year devoted to building the partner relationships and developing the programme framework. The on-the-ground efforts began in Malawi and Brazil in early 2012 and in late 2012, in Zambia.

Name of Resource	ACT - Action, Collaboration, Transformation
Type	Platform for co-operation, Monitoring and enforcement mechanism
Country / jurisdiction	Global
Organization	ACT
Date of initial launch	2017
Description	<p>ACT (Action, Collaboration, Transformation) is an agreement between global brands and retailers and trade unions to transform the garment and textile industry and achieve living wages for workers through industry-wide collective bargaining linked to purchasing practices.</p> <p>ACT is a global commitment on living wages in the sector that provides a framework through which all relevant actors, including brands and retailers, trade unions, manufacturers, and governments, can exercise their responsibility and role in achieving living wages.</p> <p>ACT members have agreed the following principles: a joint approach is needed where all participants in global supply chains assume their respective responsibilities in achieving freedom of association, collective bargaining and living wages; agreement on a living wage should be reached through collective bargaining between employers and workers and their representatives, at national industry levels; workers must be free and able to exercise their right to organize and bargain collectively in accordance with International Labour Organization Conventions.</p>

O r g a n i z a t i o n	Bluenumbers
I n i t i a t i v e l a u n c h d a t e	1 November 2017
D e s c r i p t i o n	<p>Bluenumbers were introduced at the UN in 2015 as a tool to track and measure the Sustainable Development Goals (SDGs) from a beneficiary-centric perspective. Bluenumbers can identify, enable and empower individuals, such as small farmers or conscious consumers. We help businesses trace their supply chains, verify and analyse their data, and generate evidence to support their sustainability claims. BlueView is a public good using anonymized Bluenumbers to show the location of people relative to global risks and impacts such as fires and burning, deforestation and other hazards. These data sets of people and organizations at locations enable instant understanding of who is impacting, or being impacted, in climate zones or human development.</p> <p>Companies and governments work with Bluenumbers to reach farmers and workers in complex and dynamic supply chains. Bluenumbers are currently focused on smallholder palm oil farmers in Malaysia and garment factory workers in Bangladesh. To avoid data slavery, farmers and workers own their own data. Companies share non-competitive data from private Bluenumbers supply chain maps, which provide full traceability to the last farmer or worker. The companies visualize who produces their products, and gains valuable insight and analysis to report on livelihoods, education, health and other indicators for human rights and development.</p>

Name of Resource	Daimler AG - Human Rights Respect System
Type	Corporate Policy

C o u n t r y / j u r i s d i c t i o n	Global
O r g a n i z a t i o n	Daimler
D a t e o f p u b l i s h i n g	May 2018
D e s c r i p t i o n	This corporate policy sets to ensure that Daimler's products contain only raw materials that have been mined and produced without human rights violations. Due to the complexity of the supply chains and the multitude of raw materials in their products, a risk-based and strategic approach is required. The Human Rights Respect System aims to recognize and avoid risks and possible negative effects of corporate action on upholding human rights at an early stage. The Human Rights Respect System will be used both in Daimler's supply chain as well as in their majority held entities. The System draws on Daimler's Compliance Management System, which consists of four steps: risk assessment, programme implementation, monitoring and reporting.

N a m e o f R e s o u r c e	FM Global Resilience Index
T y p e	Score / Measurement / Metric

Country / jurisdiction	Global
Organization	FM Global
Date of initial launch	2018
Description	<p>The FM Global Resilience Index is a data-driven tool that ranks 130 countries and territories according to their enterprise resilience to disruptive events. It aggregates 12 drivers of resilience into three factors (categories)—economic, risk quality and supply chain.</p> <p>The supply chain factor includes corruption control, quality of infrastructure, and quality of local suppliers and visibility of supply chain across a country. With the index, executives will be able to prioritize their enterprise risk management and investment/expansion decisions and gain powerful insights about risk and opportunities to guide their strategy in five key areas: determine which locales are most resilient to disruptive events; site new facilities or expand existing ones; select suppliers; evaluate established supply chains; identify customers who may be vulnerable.</p>

Na me of Re so urce	Human Trafficking Risk Index
Ty pe	Score / Measurement / Metric

C o u n t r y / j u r i s d i c t i o n	Global
O r g a n i z a t i o n	Dun and Bradstreet
D a t e o f p u b l i s h i n g	2016
D e s c r i p t i o n	The Human Trafficking Risk index provides insights into where potential human trafficking may exist deep within companies' supply chain – Dun & Bradstreet created this proprietary scoring index by “marrying” its corporate database –with more than 280 million company records – to data from the International Labor Affairs Bureau and the United Nations Department of State. Forced labour is more likely to occur in certain geographic regions and product sets, so the data creates an analytic index that evaluates the potential for one of company's suppliers to be involved in human trafficking based on the location of the supplier and the product or commodity type they provide. HTR creates an automated, repeatable, closed-loop process to proactively monitor the supply chain for potential human trafficking violations.

D e s c r i p t i o n	Sourcemap is a provider of supply-chain visualization and transparency solutions. Sourcemap was launched in 2008 at MIT as a supply chain management platform rooted in transparency. Since 2011 the New York City-based start-up has been developing software and services needed to take companies on the journey to radical transparency. Today Sourcemap software runs the most powerful platforms for transparency and traceability on the market, including Open Sourcemap, the world's largest public repository of supply chains, the Open Factory Registry, a unique tool that matches the names and addresses of hundreds of thousands of factories around the world, and Sourcemap Enterprise: a suite of software for companies to manage their transparency trajectory in-house. Sourcemap Enterprise was the first platform designed to manage multi-tier supply chains, including advanced database technology that traces individual products from raw materials to end customers, and award-winning visualizations to make sense of it all.

D e s c r i p t i o n	Primark's Code of Conduct commits to sourcing its products and that its procurement is carried out in strict accordance with the Primark Code of Conduct which incorporates the United Nations Charter, Chapter IX, Article 55. All suppliers of products to Primark do so in accordance with this Code of Conduct. When suppliers breach this Code of Conduct, Primark sets to work with them to improve business standards and employee welfare. Primark reserves the right to terminate our arrangement with that supplier immediately for appropriate transgressions or where there is no willingness to make the necessary changes. The Code is a mandatory requirement that is subject to audit. In order to achieve this Primark, expects its suppliers to adopt an open attitude to the monitoring activities that will be implemented and to give all cooperation to its own and any third party auditors employed.

D a t e o f i n i t i a l l a u n c h	June 2014
D e s c r i p t i o n	<p>The Responsible Minerals Assurance Process (RMAP), formerly the Conflict-Free Smelter Program, is helping companies make informed choices about responsibly sourced minerals in their supply chains. Focusing on a “pinch point” in the global metals supply chain, the RMAP uses an independent third-party audit of smelter/refiner management systems and sourcing practices to validate conformance with RMAP protocols and current global standards. The audit employs a risk-based approach to validate smelters’ company level management processes for responsible mineral procurement. Companies can then use this information to inform their sourcing choices.</p> <p>A list of smelters and refiners that meet the requirements of the audit standards are published on this website. The audit standards are developed according to global standards, including the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and the U.S. Dodd-Frank Wall Street Reform and Consumer Protection Act.</p>

D a t e o f p u b l i s h i n g	October 2018
D e s c r i p t i o n	<p>The London Metal Exchange is proposing that all of its brands undertake an assessment against the red flag indicators set out by the Organisation for Economic Co-operation and Development. Any brands where this assessment indicates a higher risk in respect of metal sourcing practices would be expected to undertake an audit against an industry standard which has been shown to incorporate the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, or an equivalent. Furthermore, and given the greater industry focus on two specific metals (cobalt and tin), the LME will expect all brands of these metals to undertake such an audit.</p> <p>It is not the intention of the LME to publish its own standard; rather, it will allow those producers requiring an audit to elect an existing standard which has been independently assessed as being consistent with the OECD Guidance.</p>

Name of Resource	Supply Chain Sustainability Procurement Guidance – How to embed best practice in your procurement when combating modern slavery
Type	Report / analysis; Guidance on policy / legislation implementation
Country / jurisdiction	Global
Organization	Supply Chain Sustainability School

Date of publishing	July 2016
Description	The aim of the Guide is to help organizations identify their risks, embed the modern slavery requirements within the prequalification and contracting process and finally support the auditing and supply chain management processes. It has been written for procurement professionals, sustainability advisors and individuals who make procurement decisions as well as those who support them. It provides guidance on how to address the issues relating to modern slavery through everyday procurement activities and has been specifically written for sectors covered by the Supply Chain Sustainability School. The Guide compliments or builds on existing guidance that has been published to date.

Sancroft

N ame of Resource	The Sancroft-Tussell Report: Eliminating Modern Slavery in Public Procurement
Type	Report
Country / jurisdiction	United Kingdom, Global
Organization	Sancroft
Date of publishing	2017
Description	<p>This report explores how central government's top contractors are facing the challenge of identifying and addressing modern slavery. It analyses the modern slavery reporting performance of the top 100 suppliers to central government, ranked by the value of contracts won by them in 2017. It goes on to set out the business case for companies to do more to eliminate modern slavery in their operations and supply chains, providing guidance to business on where, how, and why they should be taking effective action to manage modern slavery risk. It also touches upon the role of central government in incentivizing better performance by businesses.</p> <p>Analysis of performance was guided by the legal compliance of each modern slavery statement, and the degree to which the statement responded to the six suggested reporting areas as outlined in the Modern Slavery Act (MSA) itself. An overarching trend was the wide variance in both legal compliance and quality of published statements.</p>

Name of Resource	VF Traceability initiative
Type	Traceability/practical tool
Country / jurisdiction	Global
Organization	VF Corporation
Date of initial launch	2018
Description	VF's supply chain spans approximately 50 countries and thousands of contract suppliers. The company sets out to ensure that its products are made with responsibly sourced materials by tracing where they originated. VF's traceability initiatives intend to provide visibility into some of their most pressing supply chain issues and risks. VF partners with its suppliers to bring best practices to their businesses and help prevent any occurrence of human rights violations.
