

Forced Labour Risk Determination and Mitigation

Nam e of Reso urce	Forced Labour Risk Determination and Mitigation
Type	Analysis tool
Coun try / jurisd iction	Global
Orga nizati on	Made in a Free World
Date of publi shing	2011
Desc ription	Forced Labour Risk Determination and Mitigation is a software product that gives insight into the complex web of global business-to-business commerce and locates specific hot spots of risk in a supply chain for any industry. Forced Labour Risk Determination and Mitigation provides companies with a clear blueprint to mitigate their risk of unknowingly investing in suppliers who exploit forced or child labour.
