

# The Supply Chain Leadership Ladder 2.0

Name of Resource	The Supply Chain Leadership Ladder 2.0	
	Type	Report
	Country / jurisdiction	Global
	Organization	Business for Social Responsibility
	Date of publishing	15 May 2019
	Description	The Supply Chain Leadership Ladder is a maturity model that BSR has developed for companies to evaluate and evolve their approach to supply chain sustainability. A better understanding of their current standing with regards to supply chain knowledge, management, and supplier engagement helps these companies to identify how and where they need to invest in their supply chain in order to drive competitive advantage. Supply chain sustainability, also known as responsible sourcing, sustainable sourcing, responsible supply, sustainable procurement, and by other names, continues to evolve, and as such, the approach needed to evolve as well.
