| D a t e o f p u b l i s h i n g | July 2016 |
| D e s c r i p t i o n | The aim of the Guide is to help organizations identify their risks, embed the modern slavery requirements within the prequalification and contracting process and finally support the auditing and supply chain management processes. It has been written for procurement professionals, sustainability advisors and individuals who make procurement decisions as well as those who support them. It provides guidance on how to address the issues relating to modern slavery through everyday procurement activities and has been specifically written for sectors covered by the Supply Chain Sustainability School. The Guide compliments or builds on existing guidance that has been published to date. |
